Ambetter Covered Drug Changes Effective January 1, 2022

Ambetter from Sunshine Health wants to make sure that our members receive the best care at the lowest premium. One way that we do that is by monitoring the cost-effectiveness of drugs that are covered by our plan. To provide our members with the lowest possible premium for 2022, we’ve made changes to our list of covered drugs. These changes become effective **January 1, 2022**.

To obtain a full list of covered drugs, please see our [2022 Prescription Drug List](#).

We value having you as an Ambetter from Sunshine Health provider and we hope this information allows you to make informed decisions about managing your patient’s health.

Zonalon	Product removed from the formulary	generic Zonalon
Zyrtec-D	Product removed from the formulary	generic Zyrtec-D
Zytiga	Product removed from the formulary	generic Zytiga

KEY:

Add Prior Authorization (PA)

If a drug requires a PA, it means that you will need to provide us with documentation that the drug is medically necessary and, in some cases, that other more cost-effective drugs have been tried and were not effective.

Add Quantity Limit (QL)

If a drug has a QL, our plan covers a specified amount of drug within a specified time period. QLs are based on FDA-approved prescribing information, medically-accepted guidelines, or to help ensure appropriate utilization.

Add Split-Fill (SF)

SF drugs are limited to 15-day supplies for the first 90 days when starting new therapy. Drugs are designated as SF because they often have significant side effects which cause members to discontinue the drug early. SF prevents members from paying for full 30-day supplies of drug they may be unable to tolerate.

Change Tier

Because new drugs become available on a regular basis and brand name drugs become available in generic versions, certain drugs have changed drug tiers due to the availability of more cost-effective alternatives.

Remove Coverage

If a drug is removed from the list of covered drugs, it means that you will need to prescribe an alternative product, or will have to provide us with documentation that the removed drug is medically necessary and, in some cases, that other most cost-effective drugs have already been tried and were not effective.
